

Geography in the news

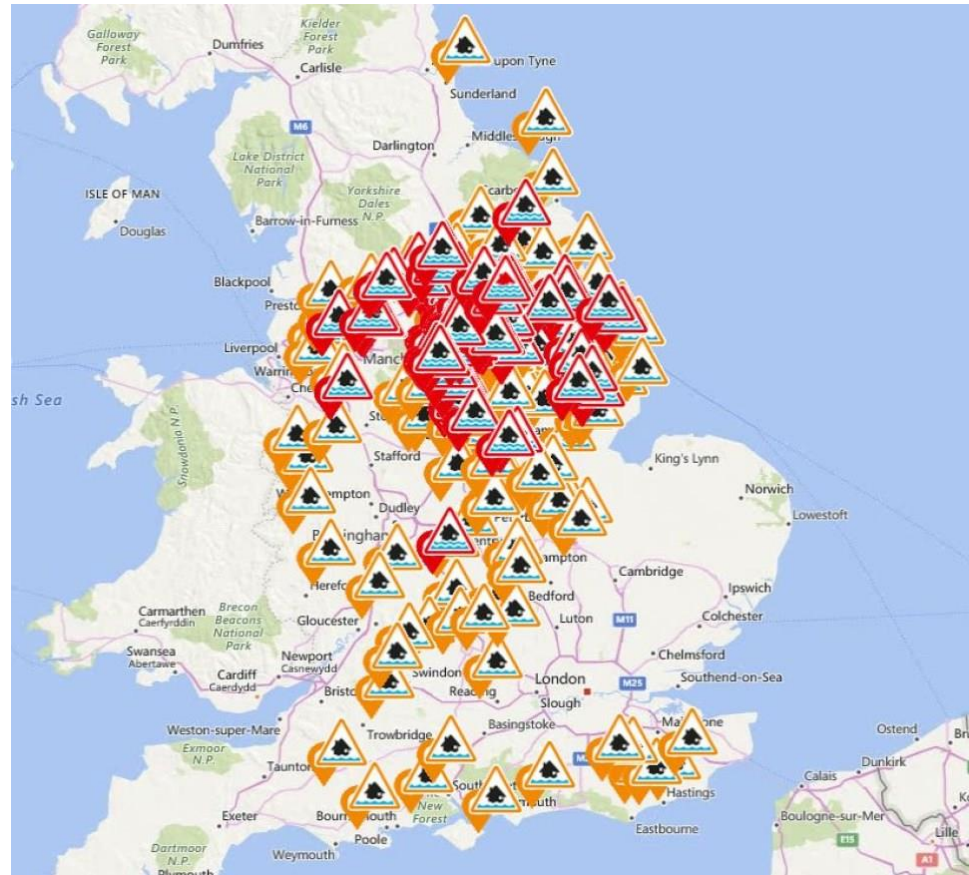

Flooding has hit the headlines over the last few months. Using the BBC web site, do a little research to find out:

- a. Where has been effected
- b. The causes of the flooding
- c. The effects of the flooding
- d. How we can reduce the impacts of flooding

You can present your work as a PowerPoint, word document or a poster. The next few slides give you some more information about what you should include.

a. Where in the UK has experienced flooding?

- Include at least three locations, but no more than 5. Locate them on a map.

b. What have been the causes of the flooding in the UK?

- <https://www.bbc.co.uk/newsround/51539101>
- <https://www.bbc.co.uk/bitesize/articles/zjcg6v4>
- <https://www.bbc.co.uk/bitesize/guides/zgycwmn/revision/1>

What have been the effects of flooding in the UK?

- Create a page of images to show the impacts of flooding in the UK.

How can we reduce the impacts of flooding?

- Is there anything that can be done to prevent flooding in the first place?
- What can be done to reduce the damage that flooding brings?

Success Criteria: Flooding Project

Success Criteria

Key

- 1 I need more practice
- 2 I can do it
- 3 Good enough to be used as an example

Self assessment

Teacher assessment

Identify and locate places that have been effected

Describe and explain the causes of the flooding

Describe and explain the effects of the flooding

Describe and explain how we can reduce the impacts of flooding
